

28th Annual On Property Lambplan Ram Sale 'Springvale' 349 Adams Lane Greenethorpe 2809

Thursday 3rd September 2026

Sale starts 1 pm Sharp (coffee and lunch provided)

AuctionsPlus

Poll Dorsets Lots 1 - 148 White Suffolks from Lot 149 - 221

Welcome to our sale. The sale will also be simultaneously interfaced on Auction Plus.

All rams will be sold individually and in catalogue order. White Suffolks will be penned at the front of the shed to allow inspection to continue while the Poll Dorsets are being sold.

Animal Health / QA

MN3 and 2nd Generation Approved Vaccinated for Ovine Johnes Disease - Certificate NS 76232, Ovine Brucellosis Accredited Free - Certificate 76316

All lambs are vaccinated with Gudair at marking and weaning, Glanery x 2, and the rams have been given a full vaccination program with Glanery 6 in 1, last 6 in 1 vaccination 9/07/26, last drench Qdrench 9/07/26.

Felix Rams is a closed flock, and the sheep are declared to be footrot and lice free. A Sheep Health Statement will be displayed, and available if required. LPA NVDs will be provided with all rams.

Lambplan averages for the 2025 drop sale team (all asbvs and indexes Lambplan run 01/08/26)

BWT birthweight - lower birthweight values will produce lighter birthweight lambs (NB not in the indexes)

PWT postweaning weight - a higher PWT value ram will produce faster growing progeny

PFAT postweaning fat - the more negative the value for PFAT, the leaner the progeny will be

PEMD postweaning eye muscle depth - rams with higher values for PEMD will have more muscle especially in the high value loin area and hind quarter, and better overall carcase shape.

PWEC postweaning worm egg count - a lower (more negative) value for PWEC indicates the progeny will have lower worm egg counts and be more resistant to developing a worm burden

IMF intramuscular fat, **SHRF5** tenderness, **LMY** lean meat yield and **DRESS** dressing asbvs are displayed on sale day, and in catalogues at felixrams.com.au

Indexes are designed to help meet different breeding objectives and programs. They are simply a guide to assist in selection, however when doing so producers must consider their own breeding objective. This will involve considering your current ewe base, the environment they are run in and the target market for their progeny. Our recommendations for trade or heavy are an indication of the target market a ram may suit. Rodney and Isaac are happy to discuss this at any time.

We do not recommend lamb producers using Terminal Carcase Production (**TCP**) or Lamb Eating Quality (**LEQ**) for anything more than a very basic guide. Neither index includes BWT. We believe both TCP (30%) and LEQ (62%) have too much emphasis on the low accuracy traits of IMF and SHRF5. This DOES NOT mean that we are not trying to improve eating quality, rather their value to lamb producers is overdone in the calculation of these indexes. This is despite more than 95% of our offering being in the top 20% for both indexes. We believe you can achieve a better balance of traits by looking at the ASBVs. That is what we do.

At Felix Rams almost all the important data for these rams is collected before they are 7 months of age - reflecting what you aim to do in your prime lamb enterprise. The rams are run commercially in large management groups mainly on dryland lucerne/perennial grass pasture. Their performance is what you will see in your paddocks. What you see is what you get. Our aim is to breed sound rams to efficiently produce outstanding prime lambs. Our commitment to accurate data collection and effective management groups and their use in estimating the breeding value of rams is second to none.

Rodney, Liz and Isaac Watt

NB Ram breeders. The minimum price for a ram sold to a ram breeding flock will be \$4000. We retain the right to collect semen for our own use, at our expense, from any ram sold to a ram breeding flock.

Both our Poll Dorset and White Suffolk flocks are 5 Star for Sheep Genetics Data Quality Score. We use a combination of young sires and well linked mature sires along with DNA testing to provide high accuracy ASBVs. Semen sales, sires in the Resource Flock, and the use of AI sires increases our linkage.

Catalogues with Lean Meat Yield (LMY), Intramuscular Fat (IMF) and Dressing Percentage (DRESS) on our website www.felixrams.com.au and on pen cards on sale day.
